

SHUTDOWN EXCELLENCE

MASTER TIME. CONTROL COST.

KT's shutdown programs focus on delivering shutdown results on time and on budget while reducing possible risks associated with shutdown activities. KT has key applications that will ensure a sound risk management system is in place for your business shutdown.

KT has experienced successful execution of multi-million dollar shutdowns. Our services are tailored to meet the individual needs of your business ranging from single days of **coaching/training** to full-time **project management**.

THE KT APPROACH

KT applications provide the following to shutdowns:

- Discipline
- A common process
- Visibility of daily progress
- Managed risk
- Timely decisions by daily monitoring of cost vs. plan

Without careful planning and risk management, delays can cause the cost of lost production to far exceed the planned maintenance costs of a shutdown. A small investment in KT is minimal compared to the total costs of your shutdown or the risks of a poorly executed shutdown with costly delays and incomplete projects.

TYPES OF SUPPORT AVAILABLE

KT support for shutdowns includes:

- Shutdown definition facilitation
- Project management training
- Shutdown management training
- Lean shutdown implementation
- On-the-job coaching
- Project planning support
- Project software training and support
- Fulltime on-site support to shutdown or maintenance managers
- Teams and leader development
- Risk assessment
- Audits and recommendations

OUR CLIENTS

Selected clients with whom KT has engaged in shutdowns include:

Bluescope Steel Rio Tinto
Cement Australia Visy
Onesteel

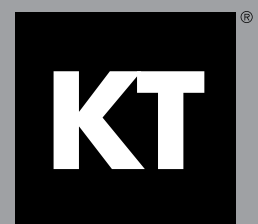

WHAT SUCCESS LOOKS LIKE

When management at a heavy manufacturing site engaged KT to improve its shutdowns, the emphasis was to complete the shutdown on time and on budget. Past shutdowns had run over time, but this time, finished product inventory was low and there was no allowing for extra hours. By working with KT, the manufacturer exceeded expectations: the shutdown came in 4 1/2 days ahead of schedule and half a million under budget. Start-up time to full capacity from the previous year was reduced from 10 days to 36 hours.
