

Leader Development Institute

Become a Kepner-Tregoe Program Leader

Prerequisites: To be considered for the KT Leadership Development Institute, you must attend a minimum 3-day Problem Solving and Decision Making, Analytic Trouble Shooting, KT Resolve®, or Project Management workshop and be interviewed by a KT professional and a representative of your organization. Final selections are based on experience and willingness to acquire the skills needed to serve as a KT Program Leader.

Audience: Functional and project managers, future managers, internal consultants, and facilitators will gain valuable skills.

Duration: 10 Days

Credits: 70 PDU's

Course Description

Employees from a variety of organizations come together to become certified as KT Program Leaders who can lead workshops within your organization. These leaders play a critical role in developing and implementing programs that drive sustainable results and align the organization for success.

The Leader Development Institute has proven to be one of the most effective methods for embedding KT **Clear Thinking** capabilities into an organization. It is an intensive skill development experience that provides in-depth concept knowledge and instructor training. In essence, they become leaders of the organization's **Clear Thinking** process and "change agents."

Skills Developed

Advance the skills you acquired in our 10-day workshop including:

- In-depth concept knowledge, instructor training, and facilitation skills
- Change the way people behave and address issues
- Apply the concepts to organizational issues
- Develop the Systematic Teaching skills to conduct workshops in-house
- Accelerate issue resolution using advanced troubleshooting skills
- Develop thinking leadership abilities that result in a powerful career, and often life enhancing experiences

Benefits

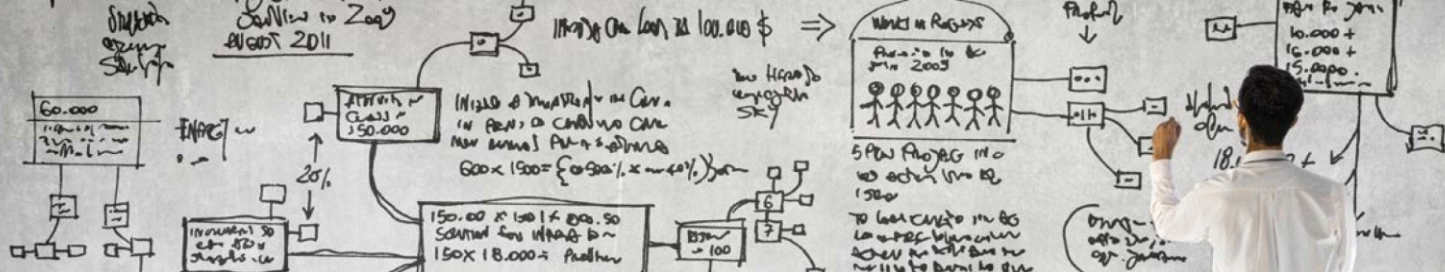

- Maximize in-house skill development capability
- Add advanced process skills to your teams
- Ability to tailor the workshop for different audiences, provide authentic examples and experiences related to the participant's own environment
- Maximize results from investment into skill development

"KT is essential to our business. We have used KT processes for years as a framework for the way we do business; they are enduring. At Smucker's, they change only in how we apply them to resolve current business issues."

Richard Smucker
Co-President
J.M. Smucker Company

Problem Solving and Decision Making

Develop your next generation of leaders

Audience: Managers, executives, and employees at any level who are required to solve problems, make decisions, and implement plans will benefit from this workshop. Broaden your critical thinking capabilities and improve your performance by becoming an issue resolution leader.

Duration: 3 Days

Credits: 21 PDU's

Course Description

This classic workshop has received an exciting upgrade! The workshop helps you learn and apply KT **Clear Thinking** techniques that improve your ability to cut through the clutter, resolve critical issues, and act decisively. You will have the opportunity to use new skills in realistic case studies and address work-related issues. You will learn to maximize the critical thinking skills essential for effective, efficient collaboration across teams, functions, and geographies.

Skills Developed

- Find the cause of challenging problems using a fact-driven approach
- Identify and plan for the resolution of high-priority issues
- Make complex decisions aligned with strategic and operational priorities
- Understand and manage risks proactively when executing projects and initiatives
- Promote and maximize the benefits of future opportunities

Extend Your Knowledge and Results with Post-Workshop Support

PSDM Library & Tablet App

- KT tablet app complimentary download
- View videos, tips and tricks

Results Delivered

- UBE (Thailand) Group's timely use of KT processes in a Pure Lactam Condensation Tube (1330 E7-2) chemical leakage situation enabled the plant to achieve cost savings of around US \$100,000.
- Mead Johnson China's reduction of Full Lab Claim inspection duration to 10 days resulted in direct and indirect savings in excess of US\$12 million
- A computer chip manufacturer solved a long-standing defect problem, saving \$2.8 million annually
- A food products manufacturer saved \$1.03 million by improving planning and decision-making by work teams
